PROGRAM OVERVIEW: The primary goal of the Pharmacy Technician Training Program is to prepare students for employment as pharmacy technicians, including preparing students to pass the National Pharmacy Technician Certification Test to become Certified Technicians. The program combines classroom instruction with lab work and clinical experience. The curriculum is based on the learning objectives established by the American Society of Health Systems Pharmacists and the national accrediting body for pharmacy technician programs.

This program was developed to meet the basic curriculum requirements of the Pharmacy Technician Educators Council. Accordingly, courses such as Pharmacy Law & Ethics, Pharmacy Mathematics and Pharmacy Work Experience were incorporated. These courses help students develop skills in areas of communication and interpersonal relations including teamwork, responsibility and initiative.
